McElroy Deutsch Recognized in The Top 50 Construction Law Firms™
by *Construction Executive Magazine*

Ranks 10th among the Nation's Law Firms with a Dedicated Construction Practice

MORRISTOWN, NJ – June 22, 2020 – McElroy, Deutsch, Mulvaney & Carpenter, LLP (“McElroy Deutsch” or “the Firm”) today announced that it has ranked number 10 in *The Top 50 Construction Law Firms™* by *Construction Executive Magazine* (“CE”). A link to the digital issue can be found [here](#).

McElroy Deutsch’s construction practice group consists of thirty-six attorneys and is led by co-chairs Louis R. Pepe and Mark A. Rosen. The heart of the practice remains the resolution of construction claims, but it also involves a wide array of related issues such as bidding disputes, arbitrations, mediations, regulatory matters, compliance, contract negotiation and formulation, liens, environmental problems, construction defect litigation, labor, as well as surety bonding questions in both the public and private sectors. The Firm’s lawyers have broad experience in all phases of construction law representing developers, contractors, subcontractors, suppliers, design professionals, sureties, insurers, and all others involved in the construction process.

Now in its 18th year of publication, *Construction Executive* is the leading trade magazine about the business of construction. In its June 2020 issue, *CE* published a comprehensive ranking of *The Top 50 Construction Law Firms™* featuring breakouts and analysis accompanied by an article in which leading legal experts discuss the impact of the COVID-19 pandemic on the construction industry. To determine the 2020 ranking, *CE* asked hundreds of US law firms with a construction practice to complete a survey. Data collected included: 1) 2019 revenues from the firm’s construction practice; 2) number of attorneys in the firm’s construction practice; 3) percentage of firm’s total revenues derived from its construction practice; 4) number of AEC clients; and 5) the year in which the construction practice was established. The ranking was determined by an algorithm that weighted the aforementioned factors in descending order of importance. For more information, contact surveys@magazinexperts.com.
